ABSTRACT:

BEST AVAILABLE COPY

A television cabinet (10) that can be structurally integrated in a piece of modular furniture. The cabinet (10) has a box-like flush-mount structure (12) that constitutes the frame for a cathode-ray tube (19), the associated audio/video electronic and electromechanical equipment (20), and the adjustment and control devices. One or more front regions and/or the top side and/or the bottom of the box-like structure are provided with holes or grilles (17,18,25,26), thus connecting the inside of the structure (12) to the outside. The box-like structure (12) may be closed with a door (22) made of unidirectionally transparent material. <MATH>
